Professional Summary

Aspiring CSE student with a strong foundation in full-stack web development, building real-world platforms using the MERN stack, Python. Passionate about backend systems and scalable architecture, with hands-on experience across REST APIs, WebSockets, authentication, and database design. Eager to contribute to production-grade systems, grow alongside industry engineers, and make a meaningful impact through clean, purposeful code.

EDUCATION

Aditya University

Information Technology; CGPA 8.53/10.00

Coursework: Operating Systems, Data Structures and Algorithms, Database Management Systems, Object Oriented Programming

Sep 2023 – Aug 2027

Kakinada, AP

Narayana Junior College

Intermediate (Maths, Physics, Chemistry); Score:90.5% / 100%

Jun 2021 — May 2023

Vijayawada, India

TECHNICAL SKILLS

Programming Languages : C++, C, Python, Java, JavaScript, SQL

Technologies & libraries : React, Node, Express, Flask, REST API, HTML, CSS, Git, Linux

Database & Cloud Services : MySQL, MongoDB, Redis

Other Tools & Libraries : Figma , Tkinter, Pillow, OpenCV, Arduino Uno

WORK EXPERIENCE

FullStack Developer | [Technical Hub](#) | Kakinada, AP

May 2026 - jun 2026

- Developed a web platform, **SkillHance**, to guide engineering students with resources on branches, coding fundamentals, programming languages, and career pathways.
- Implemented interactive features including subject overviews, quizzes, and study-abroad guidance modules with enhance user engagement.
- Applied frontend Technologies like **React, HTML, CSS** for responsive and user-friendly interface and collaborated with peers and mentors to refine features, triage issues and improve platform usability.
- Gained hands-on experience in frontend development workflows, version control and deployment.

CyberSecurity Intern | [Supraja Technologies](#) | Vijayawada, AP

Apr 2025 - Jun 2025

- Built **desktop Application** with a custom GUI using **React and flask**, integrating built-in camera functionality with **OpenCV**.
- Implemented email automation features by leveraging smtplib and SSL, enhancing the application's communication capabilities.
- Gained hands-on experience with security tools such as Burp Suite, Nmap, Wireshark, while utilizing Kali Linux commands and utilities for network and vulnerability analysis.

PROJECTS

DevSync  | *Node, Express, React, WebSockets, MongoDB, Redis*

Jan 2026 – Apr 2026

- Built a full-stack real-time social coding platform featuring private accountability circles, live streak tracking, and competitive leaderboards — integrating scrapers for LeetCode, Codeforces, and CodeChef to fetch metadata like names and topic tags for structured practice tracking
- Engineered a RESTful backend with Node.js and Express backed by MongoDB, implementing WebSocket-based real-time updates, user authentication, and a structured API covering user management, platform integration, and achievement tracking.

Exam Ready  | *Node, Express, React, MongoDB, Redis*

Oct 2025 – Dec 2025

- Built an AI-powered exam prep platform using React 19, Express.js, and Google Gemini 2.5 Flash that generates personalized study guides from uploaded PDFs — deployed at examready006.vercel.app
- Implemented a production-grade auth system using JWT (in-memory access tokens + HttpOnly refresh cookies) and Passport.js Google OAuth 2.0, featuring silent token refresh via Axios interceptors, rate limiting, and daily request quota enforcement per user

ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms problems on **Leetcode** demonstrating strong problem-solving skills and algorithmic thinking.
- Attained a 2-Star rating on **CodeChef** (Peak Rating: 1455) through consistent participation in global coding contests.
- Github Certification– **Git Foundations**: Certified in GitHub Foundations with knowledge of Git workflows.
